

RESEARCH PROPOSAL

Title: System analysis and development methods to ensure the reliability of GRID system (theme sample)

Work relevance

It is necessary to write the theme relevance (or direction)

Work aim:

The purpose of research is to:

- list the aims of research work

This goal is achieved by:

- system analysis.....;
- creation of their mathematical models *****;
- development of methods and strategies *****;
- etc.

Research objectives;

It is necessary to list objectives of the research

- conduct monitoring *****.
- conduct a comparative analysis of methods *****.
- identify all positive and negative sides *****.

Research methods and methodology

Describe what methods and methodologies will be used for research.

Scientific novelty

It is necessary to describe a research novelty.

Expected result

- What results you expect to be at the end of study.

Practical significance

What practical values can be brought by results of your research.

The volume of “Research proposal” can be from 7 to 15 pages of A4 format, Times New Roman, 14 font, 1 interval.
